

# View the Spec. Use it. Improve it.

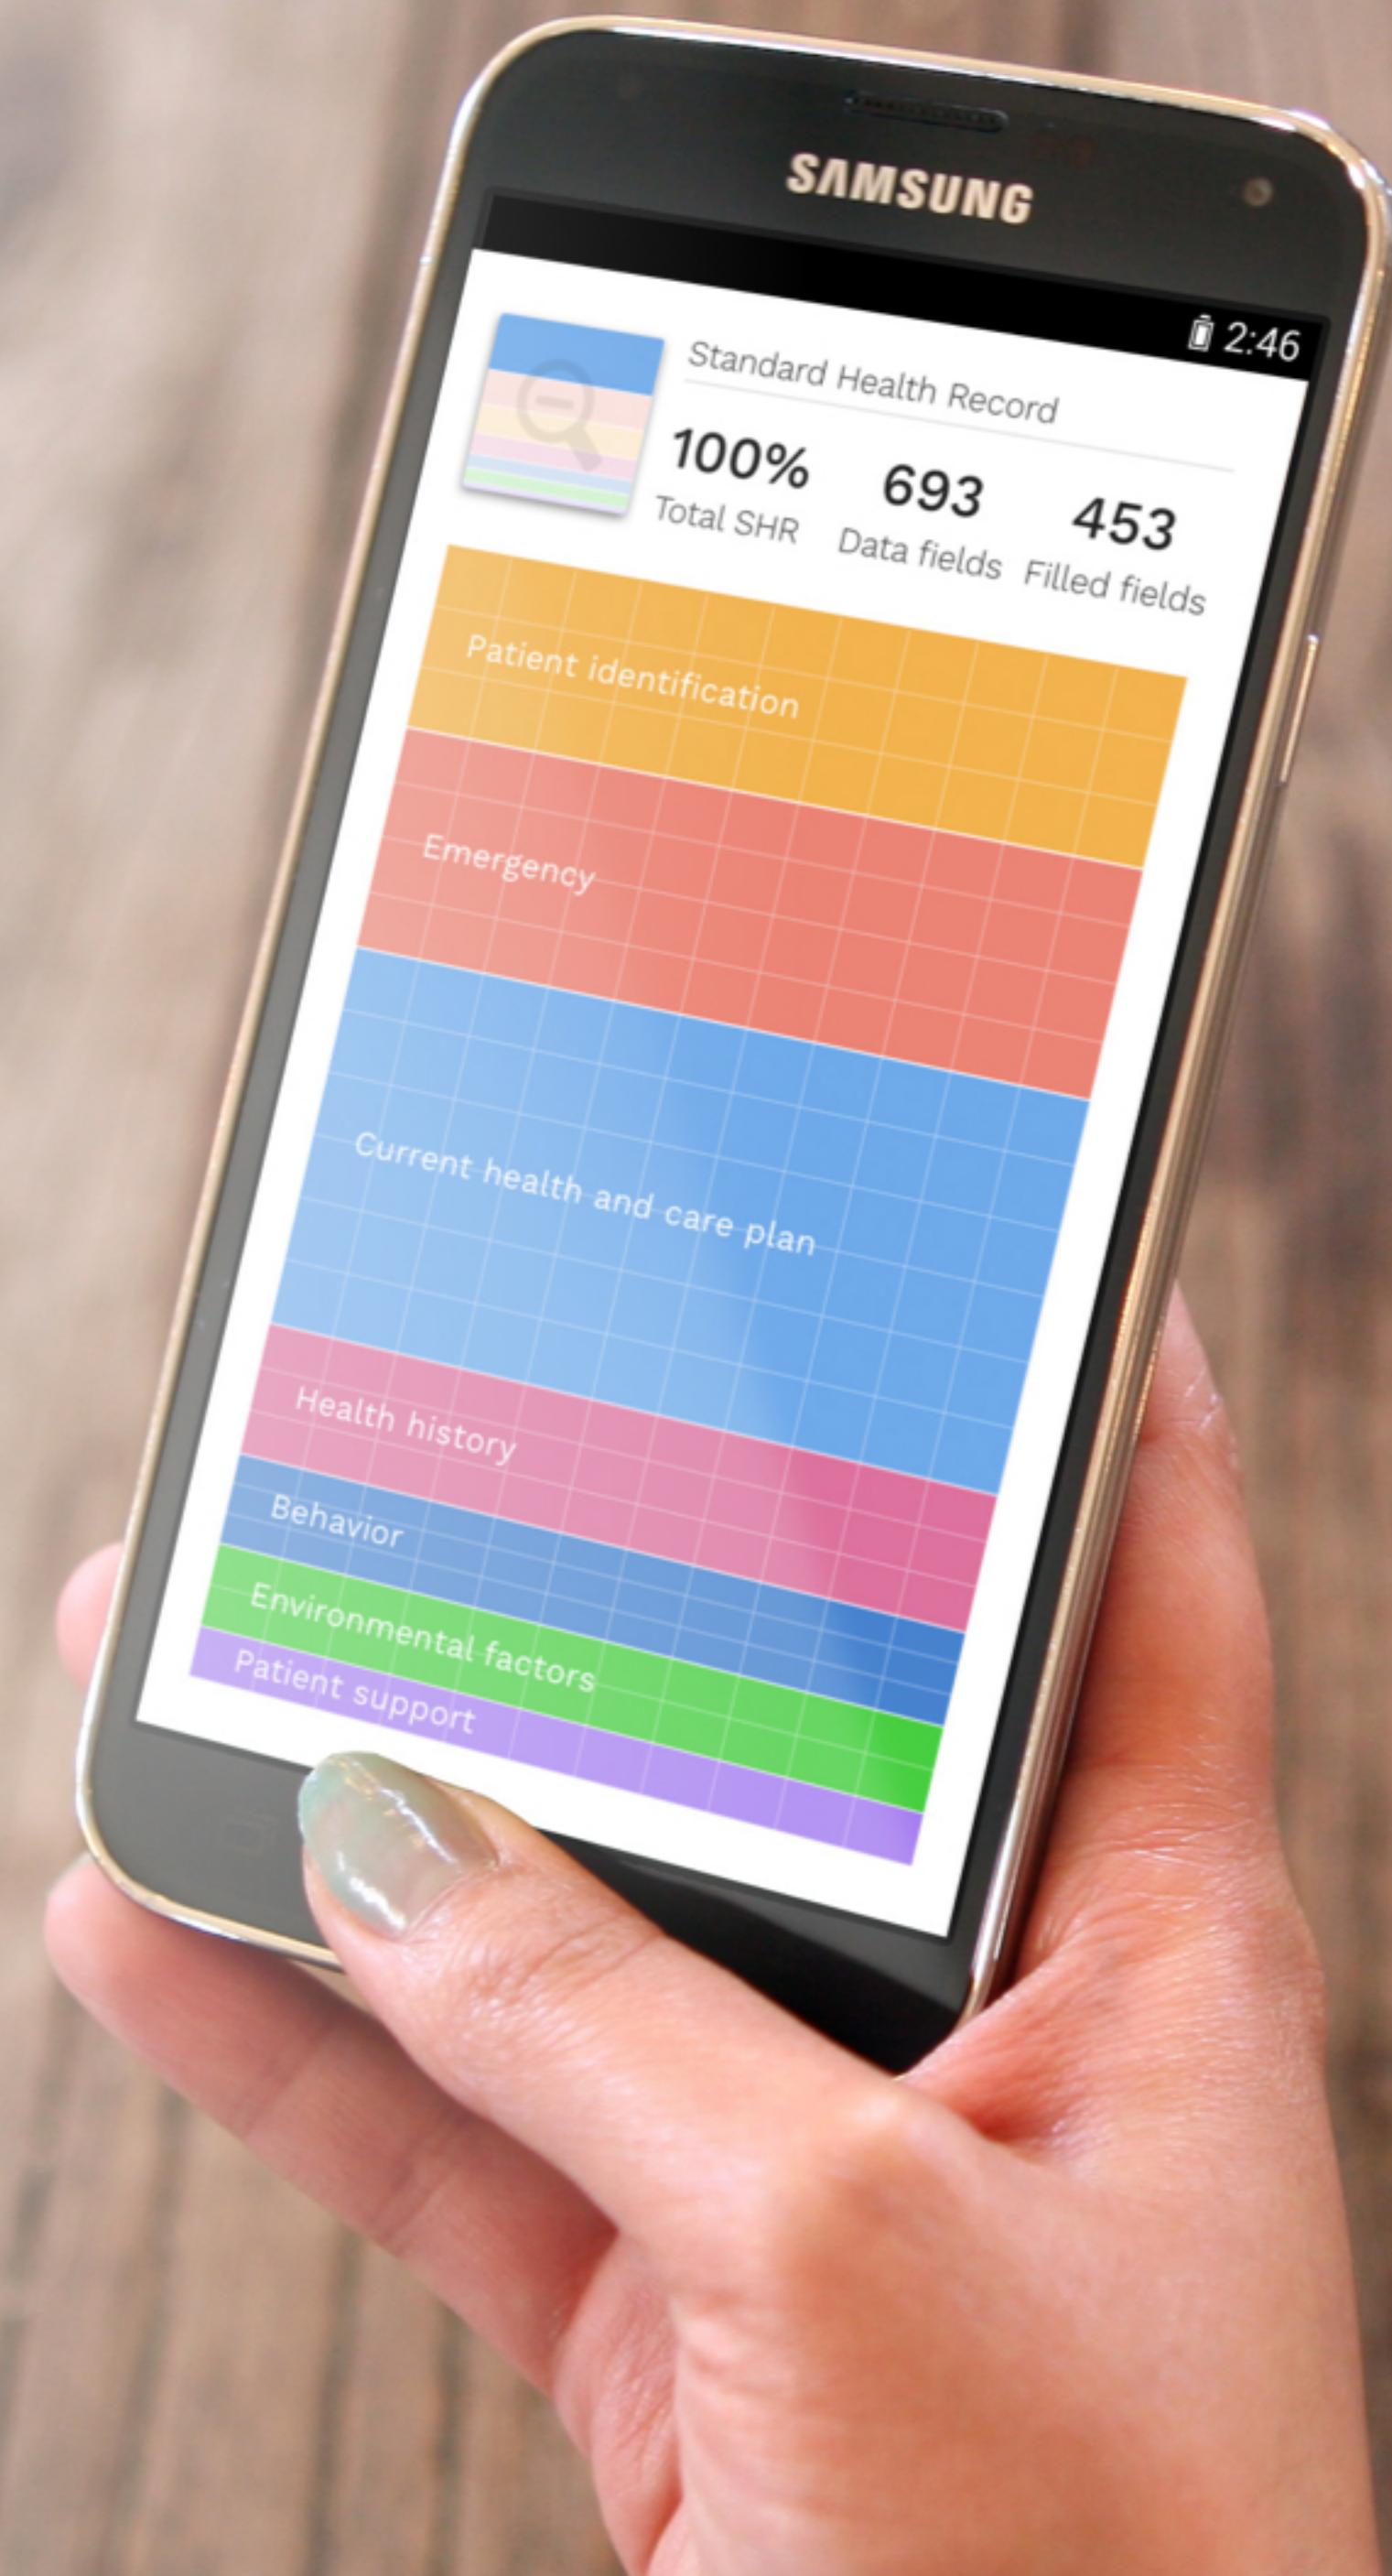

The Standard Health Record contains Patient ID, Emergency Care, and Primary Care data. Dive into each section, into each data element, and the grammar.

Give it the third degree.

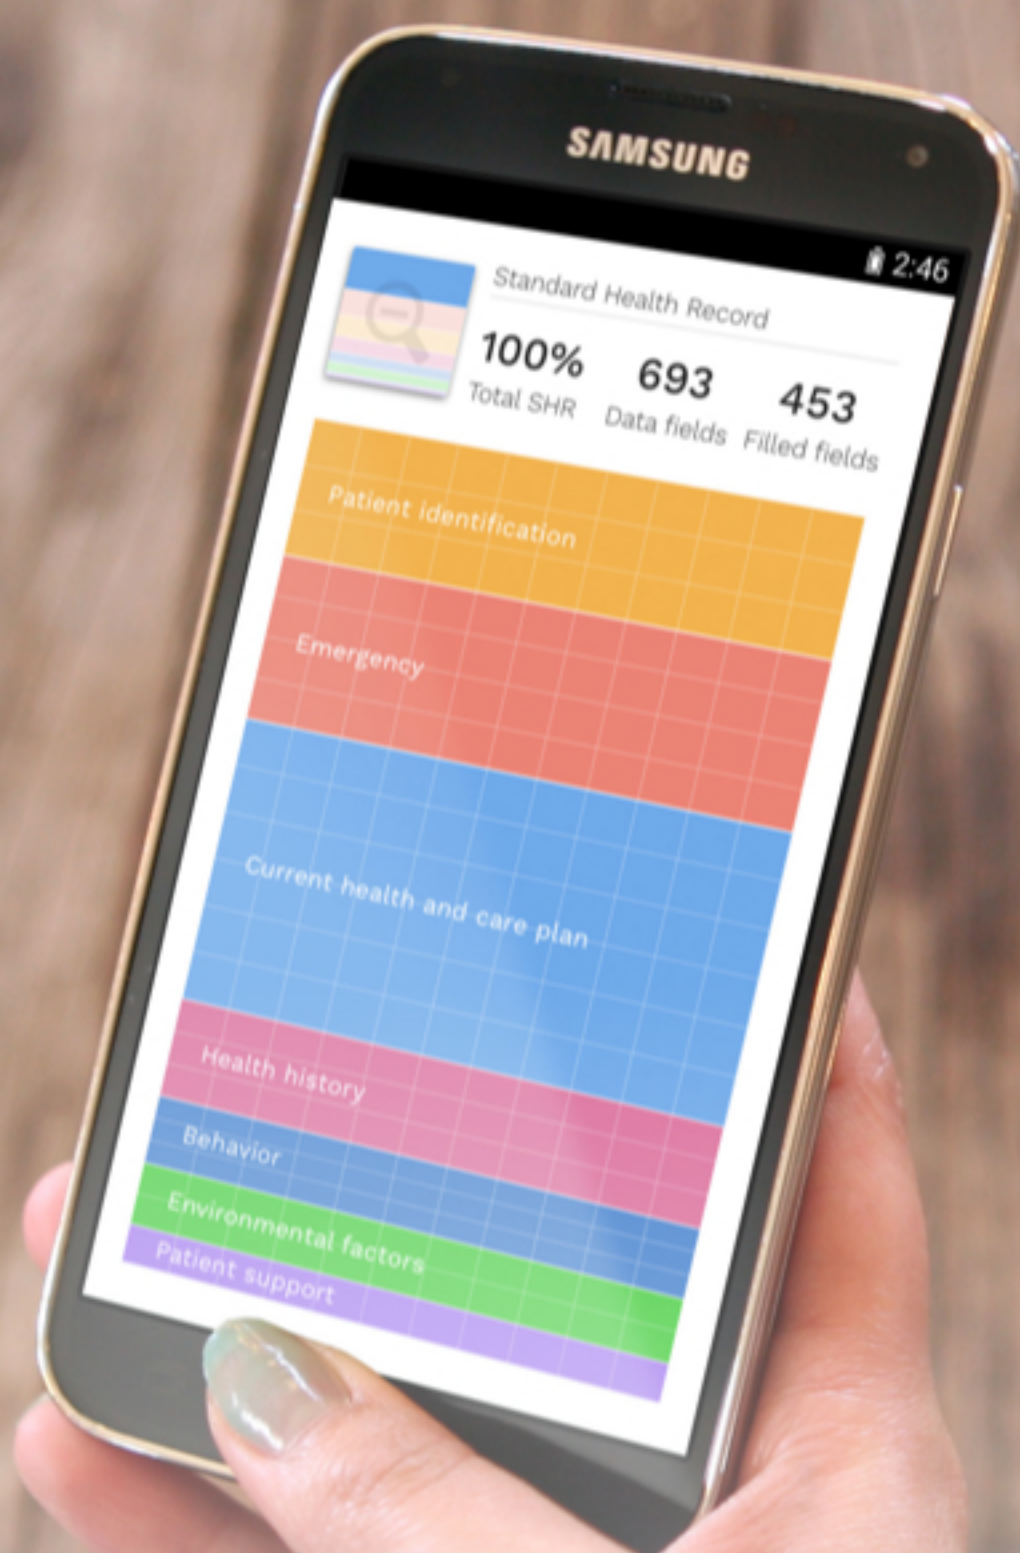

And make it better... by providing feedback on the strategy, concept, data points, to individual element details.

We need your critical input to rapidly evolve the specification for national use.

The Spec Viewer will launch in Nov.2016.
